Github LinkedIn Portfolio

CAREER OBJECTIVE

Senior QA Engineer with **4+ years** of experience in **manual, mobile, API & Website testing**. Hands-on expertise in end-to-end testing activities including test case design, execution, defect tracking, and functional as well as non-functional testing. Proficient in tools such as **JIRA, Trello, GitLab, Postman, Lighthouse, and BrowserStack**. Experienced in leveraging **AI tools** like **Claude AI** for test case generation, requirement analysis, and bug report automation — integrating modern **AI-assisted** workflows into the software testing lifecycle. Committed to delivering high-quality, reliable software products.

EMPLOYMENT DETAILS

- Senior Associate QA | **OrangeMantra Pvt Ltd** | Apr 2026 - Present
- QA Engineer | **Tec-Sense Innovations Pvt Ltd** | Apr 2025 - Jan 2026
- Software Test Engineer | **Qualimatrix Technology Pvt Ltd** (Contract -Based Project) | Sep 2024 - Dec 2024
- Jr Software Tester | **Testwell Technology Pvt Ltd** | Feb 2022 - May 2024

CORE SKILLS

Testing Expertise: Manual Testing | API Testing | Mobile Testing | Website Testing | Functional & Non- Functional Testing Regression & Retesting | Integration Testing | UAT Testing | Compatibility Testing | Smoke & Sanity Testing | Exploratory Testing Performance Testing (Lighthouse).

AI-Assisted QA (Claude AI): Prompt Engineering for QA Workflows | Automated Test Case Generation from FRD/ SRD | Requirement Gap Analysis | AI-Driven Bug Report Automation | QA Documentation via Natural Language Prompts | End-to-End AI Integration in STLC

Tools & Platforms: JIRA| GitLab | Trello | Postman | Browser Stack | Charles Proxy | Lighthouse.

Methodologies: Agile | Scrum | SDLC | STLC |Test Case Design & Execution | Bug Tracking | Defect Life cycle Management.

WORK EXPERIENCE

A quality-focused **Senior QA Engineer with 4+yr** of hands-on experience in Software Testing. Currently working in **OrangeMantra PVT LTD**. Skilled in **Manual Testing, API Testing, Mobile Testing & Website Testing**. Passionate about ensuring seamless user experiences through rigorous testing processes.

- Skilled in **Functional, Regression, Integration, Smoke, Sanity, and Compatibility Testing**.
- Hands-on experience with defect tracking and test management tools like **Jira, Trello, and GitLab**, along with API testing using Postman for validating APIs and ensuring seamless application functionality.
- Experienced in test case creation, bug reporting, regression testing, and release validation.
- Performed performance testing using **lighthouse** to improve application performance and stability.
- Experienced in test case creation, **bug reporting, regression testing,** and release validation.

AI-INTEGRATED QA PRACTICE | CLAUDE AI

- Leveraged Claude AI for AI-assisted test case generation, bug reporting, and requirement analysis.
- Improved QA efficiency, test coverage, and reduced manual effort through prompt engineering techniques.
- Utilised AI-driven workflows to streamline the STLC process and enhance overall testing productivity.

EDUCATION SUMMARY

- Bachelor of Science (B.Sc.), Magadh University (GDM College) – 2019 | 76%.
- Software Testing Certification, Q-Spiders, Bengaluru Completed a 6-month professional training program specialising in Software Testing, including Website Testing, Manual Testing,API Testing with Postman and Mobile App Testing using Browser Stack.

PROJECT SUMMARY

Project 1: AUM PHARMA

Project Description

AUM Pharma is an online pharmacy where users can easily order genuine medicines, upload prescriptions, and get fast home delivery with secure payments, discounts, and expert health tips.

Roles & Responsibilities

- Develop, execute, and maintain detailed test cases to ensure comprehensive software validation.
- Identify, document, and track defects using bug-tracking tools while ensuring clear communication with development teams.
- Conduct functional, regression, and exploratory testing to validate new features and maintain software stability.

Project 2 : QUICK HIRE

Project Description

QuickHire A recruitment platform designed to streamline job postings, candidate management, interview scheduling, and hiring processes through a web application.

Roles & Responsibilities

- Designed and executed test cases to validate application functionality, usability, and overall system performance.
- Performed Functional, Regression, Smoke, and API Testing using Postman to ensure seamless workflow and integration validation.
- Identified, documented, and tracked defects while collaborating with developers to ensure timely issue resolution and stable releases.

Project 3: OPTIMUM EV SOLUTIONS

Project Description

Optimum EV Solutions Performed QA testing of an EV solutions website, covering enquiry forms, product modules, and navigation workflows.

Roles & Responsibilities

- Designed and executed functional and responsive test cases.
- Conducted UI/UX validation and cross-browser testing.
- Reported defects with detailed steps and evidence.

Project 4: FINE-FITAPP

Project Description

Fine fitApp is a user-friendly fitness app offering personalised workouts, nutrition tracking, progress updates, goal setting, community support, and device sync to keep users motivated.

Roles & Responsibilities

- Tested the Fine Fit app to ensure smooth functionality for gym membership management and resource access.
- Verified features like lesson scheduling, membership renewal, and in-app payments.
- Performed functional, compatibility, and regression testing across various devices.

Project 5: ALTRICITY

Project Description

Altricity is a Flutter-based app that connects with a car-installed device to charge or jump-start lead-acid batteries in winter. It displays voltage levels and manages battery health through a user-friendly interface.

Roles & Responsibilities

- Extensive experience in mobile and manual testing, including physical and cloud-based device testing.
- Conducted integration testing using Apple Test Flight for seamless developmental app distribution.
- Tested Altricity hardware-sensor sensitivity, ensuring accuracy by matching with voltmeter readings.
